

Millipede Class consists of 10 pupils and 5 staff to support us to learn and engage.

This year we will focus on building relationships with our supporting staff and with each other, through shared sensory activities. We will be spending lots of time exploring the outdoor learning space and visiting the forest school area. We will be encouraged to explore the natural world around us both within the classroom and in the wider school community.

Class staff will spend time developing the pupils' communication skills by using individual motivating items throughout the day to encourage spontaneous communications.

We look forward to an exciting and fun-filled year ahead!
