

Pinewood class is within the Functional learning approach and is based at the Snodland site. We have 6 pupils in the class between 17-18 years of age.

Pupils follow a TEACCH rotation that allows each of them the predictability of what will be happening throughout the day, in addition to using visual schedules and 'now and next' boards.

Each pupil has a tailored learning approach to meet their needs and ability. Each lesson has a 'real world' feel to it, where possible, focusing on functional skills and also taking into account the pupils' interests to enhance their learning and to assist with preparation for adulthood.
