

Bumblebee is one of our EYFS classes with 9 pupils aged between 4 and 6 years old, who predominantly have mobility, medical and sensory difficulties.

In Bumblebee class we have lots of fun using our senses to explore the world around us and we are learning to show curiosity about objects and people. We take an individualised approach to learning which allows each pupil to focus on what is most important for them.

Our main focus is on developing our physical abilities. We do this through individualised physiotherapy programmes, the MOVE program and fine motor activities. We also focus on building our attention and communication skills through many fun programmes such as; The Curiosity Programme, Intensive Interaction, Sensology and Dance Massage.

We love being outside and pride ourselves on being weather warriors!! We enjoy water play in the sun, splashing in muddy puddles and having snow ball fights in winter. Our favourite thing to do is playing with anything messy, from paint to shaving foam, to mud to chocolate slime!
