

Chipmunk class has 11 pupils with ages ranging from 6-7 years old. Pupils are supported by 4 members of staff; a Class Teacher, a Senior Teaching Assistant, a Teaching Assistant and a Cover Teaching Assistant. Chipmunk class are within the Structured learning approach. This means we follow a TEACCH rotation in class consisting of; 1:1 work, workstation, group work and leisure time. We use this rotation to help us to understand our day and what is expected of us. These activities help us to develop communication, self-regulation, independence and life skills.

Chipmunk class pupils enjoy Attention Autism sessions, cooking and all things messy! We especially like exploring the sensory garden and having fun in the soft play area. We are looking forward to strengthening our skills this year to help us to achieve our EHCP targets. We are excited to build our relationships with one another.
