

Honeysuckle class has 6 key stage 2 pupils, a Teacher, Senior Teaching Assistant and a Teaching Assistant. We are in the Sensory learning approach, so our sessions focus on independence, our body, communication and me and my community.

Every day we work on our Educational Health Care Plan targets. We take part in sensory circuits, messy play, tuff tray exploration and fine motor skills tasks. We spend lots of time outside in the sensory garden, completing horticulture lessons, playing in the soft play and spending time being active on the field.

Honeysuckle class take part in events in our learning approach and across the whole school, such as assemblies, signing choir and visiting the outside learning environment. Some of us also practice our targets in the hydro pool and multisensory room.

We participate in cooking each week and we enjoy art and learning through getting messy. Attention Autism activities, Tacpac and massage are also completed regularly. We have lots of fun in Honeysuckle class.
