

Snowdrop class has 7 pupils and a staff team to support them. The class is within the Sensory learning approach, so pupils enjoy sensory exploration of touch, smell, taste, sight and hearing.

Pupils often get very messy in sensory play and they love it! They love group activities, such as Attention Autism sessions, where they can work on their anticipation and exploration skills.

Outside is Snowdrop pupils' favourite place to be, where they can have fun with water play and physical activities. They enjoy going to the farm to visit the animals and exploring their surroundings in the sensory garden.
