

Welcome to Elgar class. We are a key stage 2 class within the Structured learning approach and are made up of 12 pupils and 4 staff members. Pupils range between years 5 and 6.

This year, pupils will be learning about a wide variety of topics. Numeracy and literacy are designed to help build key life skills and support independence, as well as build knowledge. Pupils will be learning lots about themselves, where they come from and the world around them. They will be looking at how, as people, we change throughout the course of our lives as well as changes that can occur closer to our current ages.

Pupils will learn about festivals around the world and how different cultures celebrate. They will engage in cooking lessons throughout the year, learning how to cook a variety of different things. This may be cooking a main part of a meal or a sweet treat for desert. They will focus on all the key aspects of creating good food; making a shopping list, buying the ingredients, prepping a kitchen and learning how to keep themselves safe when cooking.

Elgar class will make trips to access the community, whether this be end of term trips to exciting places or more regular local trips to shops to build on their independence skills of accessing public places and how to use money correctly. Pupils will be working on a variety of exciting and useful life skills this year and are very excited to share this knowledge throughout the year.
