

Koko are a class within the Early Years learning approach, with 7 pupils, a Class Teacher and 2 Teaching Assistants.

Pupils learn through the Curiosity Approach, TEACCH rotation learning, real-world and structured play experiences. We value nature and enjoy time dedicated to outside learning opportunities, which provide time to explore the natural world.

Our outside area plays an important part in our learning, allowing us to develop our gross motor skills and play cooperatively with our friends. It also allows us to explore messy and sensory play experiences. Our classroom is calm and inviting with low stimulation, allowing us to focus on learning and to explore learning opportunities with all of our senses.
