

Skippy class has 10 pupils ranging from reception to year one. We have 4 members of staff who support us in our learning. We follow the Early Years Approach, learning through exploration, investigation and following the child's lead. We are inspired by the curiosity learning approach, finding inspiration and awe in the world around us.

Routine and knowing what exciting activities we will be participating in next is very important to us, so we use schedules and visuals to support us to understand this.

Our areas of learning include; TEACCH approach - promoting independence and readiness to learn, Tac Pac, The Curiosity Approach, Saplings (Forest School), life skills, Attention Autism and exploration of letters and numbers.

Pupils love sensory play and messy play, which help them to explore and become curious learners. We love to immerse ourselves in our sensory exploration.
