

Bridgetower class is within the Structured learning approach. In class, there are 7 pupils who are supported by a Teacher, a HLTA and 3 Teaching Assistants.

We learn using the TEACCH approach, where we complete 1:1, group and independent activities with a leisure period in between each area of work. We use lots of visuals to support us in class including individual schedules which tell us what we are doing throughout the day, communication boards and choosing boards. Pupils will be engaging in activities that specifically focus on their EHCP targets as well as focusing on their personal, social and emotional development.

We have a 'hands on' approach to our learning and enjoy sensory activities. We engage with Attention Autism, sensory circuits, Write Dance, HandyPac and Dough Disco in small groups. Pupils have access to a well resourced outside area to enable them to learn in outdoor environments.
