

Monet class is within the Sensory learning approach. We have a vibrant, inclusive sensory classroom that supports pupils who are exploring their environment and developing their independence.

We focus on exploration, communication and engagement through rich, multisensory experiences. Each day, pupils take part in activities such as sensory stories, music and movement, water and tactile play, outdoor learning in our "Saplings" forest sessions and calming sensory regulation routines. Every experience is designed to build physical skills, emotional regulation, communication and independence, following each pupil's individual learning pathway. Monet class celebrate every step of progress, fostering joy, curiosity and connection in a nurturing environment.
